What's New On The Farm

DAVE TETREAULT
OPERATIONS MANAGER

Hello herb lovers,

Spring has arrived, and we at Pacific Botanicals are thrilled to share our progress with you. As we enter our 44th year of cultivating botanicals, nurturing our soil, and serving our community, we are proud to announce a significant step forward in our commitment to sustainable agriculture practices.

In February, we received Regenerative Organic Certification® approval from the Regenerative Organic Alliance for all the crops grown on our farm. This achievement demonstrates our unwavering commitment to sustainability, responsible farming practices, and our local community. We are extremely grateful that the traditions created by our founder, Mark Wheeler, enabled us to reach the highest standards in farming.

Our powder mill operations are also undergoing a major upgrade. We have purchased a state-of-the-art mill system that will significantly increase our capabilities. The new system will

be operational early this fall, and our mill artisans are eager to explore the possibilities it will offer. With this new system, we will be able to increase our capacity and potentially offer new powdered botanicals that our current machines cannot produce efficiently.

In support of our powder system, we are upgrading the GMP (Good Manufacturing Processes) room that houses our current equipment. We have also created a new space to hold our existing mills. The new room became operational in April without interrupting production. We are also designing a new employee lounge, giving everyone a comfortable space to relax and break bread together. Finally, we are improving our office space by transforming an area for more effective gatherings and employee spaces.

We take pride in our commitment to our herbs, our soil, our employees, and our community. Thank you for your support, and we wish you a wonderful day and good health.

Cheers, Dave

MATT DYBALA
DIRECTOR OF AGRICULTURAL OPERATIONS

Regenerative farming has arrived at Pacific Botanicals! Regenerative Organic Certified® is an agricultural certification based on the three pillars of soil health, animal welfare and farm worker fairness. This certification requires farmers to go above and beyond practices that ensure healthy soil by increasing soil organic matter over time and sequestering atmospheric carbon in soil. It also emphasizes pasture-based systems to nurture the ethical treatment of animals, and provides standards to create fair conditions for farm workers on a global scale. Regenerative Organic Certified® was created to address the climate crisis, soil degradation, biodiversity loss, factory farming, and fractured rural economies globally.

The certification is overseen by the nonprofit Regenerative Organic Alliance. Led by Rodale Institute, the alliance is a group of experts in farming, ranching, soil health, animal welfare, and farm worker fairness. Because supporting life both below and above ground isn't truly regenerative until it's also organic, *USDA organic certification is a baseline requirement for eligibility.*

First year soil health metrics require both lab and in-field testing to calculate baseline microbial populations, evaluate microbial health and diet, and build better long-term carbon stores in agricultural fields. These metrics go beyond the basic organic requirements where farmers just test their soil for nutrient deficiencies. Regenerative Organic Certified® benchmarks also target the reduction of imported fertilizers and encourage the building of on-farm fertility by growing a diverse mix of cover crops and recycling nutrients through composting of waste material. Soil disturbance is tracked by farmers to begin implementing equipment and crop rotations that will reduce aggressive tillage over time. Farmers are also required to adopt a minimum of three regenerative practices into their land management practices. Examples include perennial plantings, pollinator habitats, riparian restoration and dozens more.

Farm worker fairness standards on a global scale are also a unique and progressive component of this certification, again setting it distinctly apart from the current USDA national organic program. Annual audits target underpaid farm workers, child labor, illegal hiring practices, improper housing and the overall health and safety of workers on farms worldwide.

Overall, regenerative agriculture is a systems-based approach that focuses on finding a balance between people, planet and economy. I am continuously grateful for your support of our farm as we continue this journey of making this world better together!

Best, Matt

SUSTAINABILITY TEAM UPDATE

The team has continued to offer opportunities for employees at Pacific Botanicals to engage more with our surrounding communities. We have continued our creek restoration work, offered trash cleanup days of the surrounding rivers, and continued our work with the local community organizations. The commitment and dedication from all is inspiring as we all delve deeper into our connection with the surrounding land and community.

In November of 2022, and again in April of this year, we offered paid volunteer time for Pacific Botanicals' employees to help with a native tree/shrub planting at the waterway that abuts the farm, Cheney Creek. The team was able to plant several native species including Pacific ninebark, Snowberry, Oregon Ash, and Big Leaf Maple. The overall goal for the project is to increase the native biodiversity on the farm, by creating habitat for the native species that rely on the healthy ecosystem.

The team has also offered educational opportunities for employees at Pacific Botanicals, including a recent Bird Walk, led by the local chapter of the Audubon Society. This event gave employees the opportunity to learn more about the birds that use the farm as habitat, whether it be along their migration, or more permanently. We will continue to offer employees the chance to learn more about the natural

world around them throughout the year.

Nate Brennan, *Sustainability Team Committee Chair*

Organic Certification: Our Cornerstone of Quality

We care about organic. It is the basis of all our efforts. We are certified by Oregon Tilth as growers and processors. Our standards meet or exceed the standards of the USDA. Our facilities are inspected by the FDA and the Oregon Department of Agriculture. Our farm is now *Regenerative Organic Certified*® and compliant with *European Union Organic Standards and Canadian Equivalency Standards* as growers and processors. Our Wildcrafted herbs are carefully harvested and dried by wildcrafters known to us who follow strict harvesting guidelines established by the company. Herbs that are *Grown Without Chemicals* are grown and shipped to us chemical-free. We offer them with the knowledge that they are grown, harvested and shipped to us with the same quality and care that we require for our Certified Organically Grown and Wildcrafted herbs. All herbal products sold, except for the sea vegetable

products, and those listed with an asterisk* are kosher certified by Earth Kosher.

In order to serve our customers' requirements for positive botanical identity, we have received *Certificates of Authenticity from the American Herbal Pharmacopoeia* for almost all of the herbs grown on the farm. Herbs from Pacific Botanicals are used by the American Herbal Pharmacopoeia to develop an identity "footprint" that other testing facilities use to evaluate the authenticity of their own herbs.

Safety Guidelines and Disclaimer

Pacific Botanicals is not licensed to prescribe or recommend any products for medicinal purposes and we are not responsible for the misuse of any of our products. Consult FDA guidelines and health care professionals regarding use. Note that the herbs in our catalog requiring precaution have a numbered footnote that corresponds with safety warnings listed at the bottom of those pages.

OUR HERBS

Key: OG=Certified Organically Grown W= Wild Harvested GWC=Grown Without Chemicals O=Regenerative Organic Certified®
An asterisk * denotes "not certified Kosher" Herbs are sold by the pound, and ALL PRICES ARE PER POUND unless otherwise stated.

Just a quick note: The Country of Origin portion of our product tables below now includes domestic herbs grown in the **USA** highlighted in **red ink**, herbs grown exclusively on **Our Farm** are highlighted in **blue ink**, all of our remaining high quality herbs remain in black ink.

NATE BRENNAN

PURCHASING AND SALES MANAGER

New products are beginning to show up on store shelves bearing the Regenerative Organic Certified® logo, as more companies begin to adopt the certification for their products. There are many reasons why brands are excited about this new certification, one being that consumers are demanding more of the story of where their products are coming from. They want to know the farm where the material is grown, and how well the workers, animals and soil are treated. A farm that is Regenerative Organic Certified® means that the consumer can trust that the holistic health of the farm is being considered in the daily operations. This was a big reason why Pacific Botanicals decided early on to pursue this new certification and lead the botanical industry into this new paradigm.

The growing interest from end use consumers, and larger companies to understand where their ingredients are coming from (the farm they are grown, or area collected), as well as the narratives of the people that help cultivate, and harvest the ingredients. These calls are driving more transparency throughout the supply chain and improving agricultural practices, worker fairness, and animal treatment throughout the world. Healthy soil provides the best environment for crops to grow well, and healthy workers are more committed to providing the highest quality botanicals.

We are excited to work with companies that are interested in sourcing Regenerative Organic Certified® botanicals that will illustrate to their customers that they too care about where their ingredients come from, and how healthy the farm is; from the soil to the workers. Please feel free to contact us to learn more about why we are so thrilled about our Regenerative Organic Certified® botanicals. We look forward to talking with you.

REMEMBER, ORDER FRESH EARLY!

For freshly harvested botanicals we encourage you to call the season before harvest time to add your name to the list.

We'll call you in advance to confirm and set up your order as each product is harvested.

ALSO PLEASE NOTE: Fresh Herbs/Flowers are shipped UPS Next Day Air.

Fresh Roots & Berries will be shipped UPS 2nd Day Air.

GENERAL ORDERING INFORMATION

PLEASE NOTE: WE HAVE A 100.00 MINIMUM ORDER AMOUNT

FOR ALL MAIL, E-MAIL AND CALL IN ORDERS

THERE IS A 50.00 MINIMUM ORDER AMOUNT FOR ALL ONLINE ORDERS.

Payment/Credit Terms

We accept VISA, MasterCard, Discover Card, or check. Credit applications are available for health care practitioners and other businesses with a history of established credit. Call or e-mail: info@pacificbotanicals.com for a credit application. A \$25.00 fee is assessed for bounced checks.

PLEASE NOTE: All credit card orders are pre-authorized the day they are packed to make sure there are sufficient funds available for payment. If there is a problem we will call you.

Ordering Online

If you would like to order online you can go to www.pacificbotanicals.com, Online Store, and follow the prompts to order. \$50.00 minimum, excluding shipping.

Ordering by Phone

Simply give us a call at 541-479-7777, choose option #1 and one of our customer care specialists will assist you. We take orders from 8am to 4:30 pm Monday through Friday Pacific Standard Time. \$100.00 minimum excluding shipping

Ordering by Mail/Fax/E-Mail

Complete the enclosed order form. Include shipping and handling charges found on the schedule on the back of the order form. Mail the order form to Pacific Botanicals, 4840 Fish Hatchery Road, Grants Pass, OR, 97527. Include your check made out to: "Pacific Botanicals" or fill in the charge card information. If you'd like to fax your order, our fax number is (541) 479-7780. \$100.00 minimum excluding shipping.

Making Changes to Orders

Due to the extra handling and added administrative costs involved we do not accept add-ons or changes to existing orders once they are placed.

Shipping

Because we are a working farm we do not guarantee 24 hour turnaround. Our preferred carrier is UPS. If your order weight is above 200 pounds we may choose a freight carrier. If your order is to be shipped to a post office box, Alaska or Hawaii we only deliver by US Postal Service which is more economical. If you need something by a specific date call your order in and we will accommodate your request if at all possible.

If you wish to have your order shipped by an expedited service (e.g. overnight, or 2nd day air) please call your order in by 9 am PST, M-F, 541-479-7777, option 1.

If you are shipping your order to Alaska or Hawaii, or if you want to use a shipper other than USPS additional shipping charges apply.

RESTRICTIONS: There are some restrictions for mailing dry plant material to California, Hawaii, Arizona and foreign countries. We cannot be responsible for any delays or rejections of product crossing into these states or imported into a foreign country. We must receive proper shipping and labeling instructions from the shipper and/or consumer. (prior to shipping)

Tracking and Order Verification

Tracking and verifying your order is easy. First you will receive via email, a copy of your order to review. Secondly, if your package is shipped UPS, the day your package is shipped you will receive

an e-mail from us containing your UPS tracking number with a link to www.ups.com. Orders via USPS will have tracking emailed when shipped.

International Orders

For all international orders (including Canada), please call 541-479-7777 x.113 or email to info@pacificbotanicals.com for detailed information and to place your order. A signed international shipping agreement will be required before we can ship to foreign destinations and it is the customer's responsibility to be aware (and notify us) of special export requirements (ie. *Phytosanitary Certificates* etc.) for customs clearance.

Damaged Product Return Policy

If your product arrives damaged please take photos of the damage and notify Pacific Botanicals immediately. Unopened, unused items may be returned within 30 days from the invoice date. Return items are subject up to a 10% restocking fee, depending on the reason for the return. Call to notify us at 541-479-7777 x.113

Pricing and Shipping Disclaimer

Pacific Botanicals does its best to manage information updates, pricing and shipping cost. However, product information in the catalogue may not be accurate at all times. Final pricing is determined at the time the order is placed into the company's order entry system and invoiced.

FOR CALIFORNIA RESIDENTS: ⚠ WARNING:

This product can expose you to chemicals including arsenic, lead, cadmium and mercury which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information go to P65Warnings.ca.gov

WE CAN NOTIFY YOU BY EMAIL WHEN AN HERB IS BACK IN STOCK!

There is an easy way to be notified when a product is back in stock. Simply go to www.pacificbotanicals.com, choose the online store, select the out of stock item that you are interested in, either from the "out of stocks" tab at the top of the page, or in the alphabetized section, then click on the "add to cart" button. A prompt will come up asking for your email. As soon as the product is in stock you will receive an email notification, and you may order it at that time.

OUR PROFESSIONAL AFFILIATIONS

AMERICAN BOTANICAL COUNCIL'S

mission is to provide education using science-based and traditional information to promote responsible use of herbal medicine; serving the public, researchers, educators, healthcare professionals, industry and media..

AMERICAN HERBAL PHARMACOPOEIA'S (AHP)
mission is to promote the responsible use of herbal medicines and ensure they are used with the highest possible degree of efficacy and safety..

THE AMERICAN HERBAL PRODUCTS ASSOCIATION (AHPA) is the national trade association and voice of the herbal products industry. AHPA is comprised of more than 350 domestic and foreign companies doing business as growers, processors, manufacturers, and marketers of herbs and botanical and herbal products..

THE USDA AND OREGON TILTH: OUR CERTIFIED ORGANIC PARTNERS

Growing and processing high quality certified organic herbs is a very complex process. It requires close scrutiny, and thorough documentation to assure compliance. We take a lot of pride, and work very hard to meet or exceed the guidelines set by the United States Department of Agriculture's national organic program. Our certifier, Oregon Tilth Certified Organic (OTCO), helps us to manage our farming operation according to these guidelines. We hope that you will get an idea of what goes into our quality control by checking out these USDA standards for organic growing and processing our herbs, and how we apply these ideas here at the farm.

SOIL FERTILITY

Crops more easily resist disease, survive drought and tolerate insects when grown in good soil. At Pacific Botanicals, we take a biological approach towards building long-term soil fertility. By amending our soil with on-farm compost, which includes any waste products from our fields or milling operations, we are able to reduce water evaporation, recycle on-farm crop nutrients and inoculate our topsoil with living organisms. Also, we dedicate nearly half of our growing acreage to cover cropping. Our cover crops reduce nutrient loss from wind and water erosion, generate an abundance of organic residue for a healthy microbial diet, and remediate habitat loss of native pollinators.

SEEDS AND PLANTING STOCK

Organic crop producers use organic seeds and planting stocks to protect the integrity of their crops. Over 75% of the herbs grown at Pacific Botanicals are grown from seed collected on our farm. This insures organic purity and avoids unknown GMO contamination from parent lineages in the past. Interestingly, plants are able to transfer specific DNA in a single generation to assist their offspring in the adapting to local conditions. This results in more uniformity and vigor across large populations of plants in our fields.

CROP ROTATION

Crop rotation is a requirement for USDA organic certification. Avoiding monoculture and planting a polyculture system of long-term cover crops, trees, shrubs, herbaceous perennials and diverse annuals increases soil biodiversity and carbon sequestration. Many of our herbs are perennials and will remain in our fields for multiple growing seasons. This results in less topsoil disturbance over time. And a continuous green cover of growing plants increases soil microbial biomass, organic residue, and overall carbon stores in our farm's topsoil.

MANAGING PESTS, WEEDS, AND DISEASES

Pest management on organic farms relies on the P.A.M.S strategy: prevention, avoidance, monitoring and suppression. Prevention and suppression are the first lines of defense against pests, weeds and diseases. In addition to using a broad variety of mechanical and physical practices, we work with our own internal seed and planting stocks, which allows us to make simple selections of desirable herb traits, that may have an increased resistance to a specific problem. A healthy field rotation of diverse

plant families and long-term cover crops will also help naturally break the cycle of disease.

MAINTAINING IDENTITY AND INTEGRITY OF ORGANIC CROPS

Organic crop producers are responsible for preventing contact between organic and conventionally-grown crops, as well as contact with prohibited pesticides or fertilizers. We retain voucher samples of each individual harvest lot and work with trained botanists or third-party labs to verify identity. Fortunately our county is one of the few counties nation-wide that has a current legal ban on growing GMO crops to help avoid indirect contamination from cross pollination.

ORGANIC PROCESSING PRACTICES

COMMINGLING AND CONTACT: To preserve the integrity of organic ingredients and products, organic processors must: Prevent commingling with non-organic ingredients and products throughout processing. Prevent contact between organic ingredients and non-organic substances, including prohibited sanitizers. Clean and sanitize processing equipment with organic approved sanitizers.

MANAGING PESTS: Organic processing facilities must emphasize prevention over treatment. This is similar to managing pests in the field and relies on the P.A.M.S strategy: prevention, avoidance, monitoring and suppression.

OUR FARM IS CERTIFIED BY OREGON TILTH CERTIFIED ORGANIC

Located in Corvallis, Oregon, the Oregon Tilth Certified Organic Program offers assessment for compliance with the USDA National Organic Program standards (7 CFR Part 205), the European Organic Program (EEC 2092/91), and the Canadian Organic Regime. At Pacific Botanicals we cannot imagine managing our complicated compliance requirements without their help and guidance. We work closely with OTCO during our yearly inspection and follow up communications, to keep our compliance accurate and continuously up to date.

HERBAL NOTES

YAUPON HOLLY

Matt Dybala, Director of Agricultural Operations

Yaupon holly is a fast-growing evergreen shrub that is native to the southeastern United States. It's very well adapted to growing in sandy soils beneath the temperate evergreen forests growing along the southeastern Atlantic and Gulf coastline. Yaupon is a dioecious plant, which indicates that male and female flowers occur on separate plants. Female plants are easiest to recognize by late summer, as they display copious amounts of bright red-orange fruits consumed by local birds and wildlife throughout the winter months. Yaupon leaves contain the only North American source of caffeine and are rich in antioxidants. Today, leaves of yaupon holly are either wildcrafted or cultivated, and the dried leaves are often brewed as a coffee or tea substitute. The early Spanish and European settlers were first introduced to brewing the leaves by local indigenous peoples living with Yaupon's native range. And ethnobotanists have documented a long history of using brewed leaves in both ceremonial and social settings. Today, yaupon still plays an im-

portant ecological role in the southern US coastal plain and maritime forest habitats, while offering a sustainable source of caffeine compared to the destructive environmental impacts associated with commercial coffee and tea plantations.

HERB PICKS ON THE FARM

Reilly Sanders: Customer Service Coordinator

My favorite Herb of all time is Stinging nettle. I love the way it tastes and its aroma when brewed as a tea or as a tincture! Reminds me of the good times I had drinking it with my grandma on summer evenings.

Brendon Mason: Mill Assistant

One of my favorite herbs that we grow and sell at Pacific Botanical is probably Blue Vervain. The herb itself is very aromatic with a minty smell to it. It's one of my favorite herbs to process in the mill. I also really love the tincture and the benefits from this herb.

Dori Moran: Quality Manager

I like using herbs that support and strengthen my nervous system. Ginkgo, Gotu Kola, Bacopa, Skullcap and Ashwagandha to name a few. I enjoy watching them grow each new season and to continually learn about my herbal allies.

"The care of the Earth is
our most ancient
and most worthy,
and, after all, our most
pleasing responsibility.
To cherish
what remains of it
and to foster its renewal
is our only hope."

-Wendell Berry

Down The Old Dirt Road

I have walked down this old dirt road countless times. Over the years it has changed me. Today the vultures are circling above. Great sweeping circles of silver feathers underneath forbidding black wings. Majestic. Prehistoric. They clean up what is dying and dead. They come close looking down at me. Red faced. Wrinkled. Curious.

Me? No, not yet. Thankfully.

I feel a bit unmoored today. Adrift in concerns, hassled by the endless noise that surrounds me. I trust though, if I keep walking, the change will come. A thrilling wind is up. It shakes and bends the Linden trees, blowing through my mind as well in a welcome release of breath. The summer

heat bakes my body. My feet crunch on the worn stone. I sense the silent hum of the growing things, the confident whisper of creation making living earth beings as it has for millions of years. And myself? Just a short timer. A bit over seventy. Made of earth's creating; walker, lover, dreamer.

I look up. The sun filters through the old oaks. The ancient light comes down healing through the leaves. I reach all my senses out into the field. I let go my tight hold on the worries I carry and let myself be welcomed home, reclaimed in kinship with the earth. I feel the slipstream of stillness in the new unfurling Echinacea blossoms. I smell the subtle perfume of Feverfew. The rising dust from the path embraces me like an old friend. The calm is seeping in. I am connected to this place. Oaks, apple trees and pear. Basil, sage, artichoke and hyssop. Thousands of blackberry blossoms along the fence like little stars seem to acknowledge my passing.

Dear Earth, feel my heart yearning for reunion. Remind me again that I am made of the atoms of suns. Ground me here in dust and stone. Giver of life, hear my praise for the thriving of the living.

I walk slowly down the old dirt road. Close to earth, my garden home, my own dear self. -D.E.
